THine has invested in Dazzo Technology Corp. to cultivate alliance opportunities.

Tokyo (February 14, 2011) – THine Electronics, Inc. (JASDAQ: 6769, “THine”), the global leader in high-speed interface and provider of mixed-signal LSI for flat panel displays and mobile phones, announced today that THine has completed its investment in Taiwanese fabless LSI maker, Dazzo Technology Corporation (“Dazzo”) to cultivate alliance opportunities with Dazzo.

THine has started its three-year business strategy “TACK100” that stands for Toward Asia: Chiwan and Korea to increase its gross profit at 10.0 billion yen until 2013. THine has invested in Dazzo with TWD49 million on January 26 2011. “Investment in Dazzo and opportunities to collaborate with Dazzo is a valuable start for THine to achieve TACK100 and offer its technological value to Taiwan and global markets” said Mr. Masahiro Kato, COO and Managing Director of THine. “THine and Dazzo will plan various collaboration opportunities in FPD markets.”

Dazzo is increasing its market position in flat panel display markets. “Both of Dazzo and THine are cultivating alliance opportunities” said Mr. Sheaffer Lee, Director and Chairman of Dazzo. “This will bring technological value and solution to global FPD markets through collaboration of THine and Dazzo.”

About THine Electronics, Inc.

THine Electronics Incorporated is a fabless maker that provides innovative mixed signal LSI and analog technologies such as V-by-One[®]HS, LVDS, other high speed data signaling, timing controller, Analog-to-Digital Converter (ADC), Image Signal Processor (ISP), and power management in growing niche markets for our customers’ solutions, targeting its strategic markets in flat screen TVs, electronic paper displays, LCD monitors, projectors, projection televisions, mobile phones, document processing, amusement, and automotive markets.
